

TRANSMISSION OF MATERIALS IN THIS RELEASE IS EMBARGOED UNTIL 8:30 A.M. (Eastern) Thursday, March 24, 2016

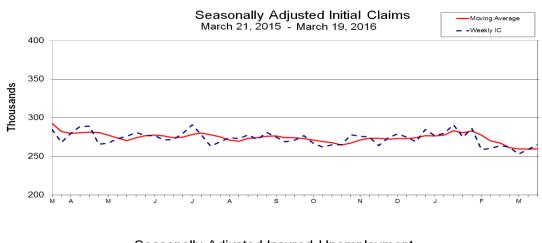

Note: This week's release reflects the annual revision to the weekly unemployment claims seasonal adjustment factors. The seasonal adjustment factors used for the UI Weekly Claims data from 2011 forward, along with the resulting seasonally adjusted values for initial claims and continuing claims, have been revised.

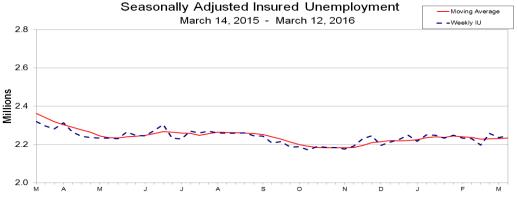

UNEMPLOYMENT INSURANCE WEEKLY CLAIMS SEASONALLY ADJUSTED DATA

In the week ending March 19, the advance figure for seasonally adjusted **initial claims** was 265,000, an increase of 6,000 from the previous week's revised level. The previous week's level was revised down by 6,000 from 265,000 to 259,000. The 4-week moving average was 259,750, an increase of 250 from the previous week's revised average. The previous week's average was revised down by 8,500 from 268,000 to 259,500.

There were no special factors impacting this week's initial claims. This marks 55 consecutive weeks of initial claims below 300,000, the longest streak since 1973.

The advance seasonally adjusted **insured unemployment rate** was 1.6 percent for the week ending March 12, unchanged from the previous week's unrevised rate. The advance number for seasonally adjusted **insured unemployment** during the week ending March 12 was 2,179,000, a decrease of 39,000 from the previous week's revised level. The previous week's level was revised down by 17,000 from 2,235,000 to 2,218,000. The 4-week moving average was 2,206,500, a decrease of 13,500 from the previous week's revised average. The previous week's average was revised down by 23,250 from 2,243,250 to 2,220,000.

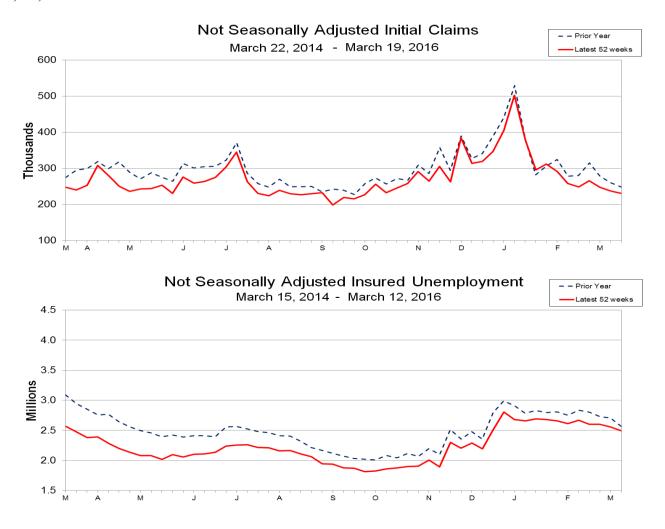

UNADJUSTED DATA

The advance number of actual initial claims under state programs, unadjusted, totaled 230,888 in the week ending March 19, a decrease of 6,024 (or -2.5 percent) from the previous week. The seasonal factors had expected a decrease of 10,898 (or -4.6 percent) from the previous week. There were 248,032 initial claims in the comparable week in 2015.

The advance unadjusted insured unemployment rate was 1.8 percent during the week ending March 12, a decrease of 0.1 percentage point from the prior week. The advance unadjusted number for persons claiming UI benefits in state programs totaled 2,490,752, a decrease of 64,584 (or -2.5 percent) from the preceding week. The seasonal factors had expected a decrease of 19,964 (or -0.8 percent) from the previous week. A year earlier the rate was 2.0 percent and the volume was 2,705,148.

The total number of people claiming benefits in all programs for the week ending March 5 was 2,602,151, a decrease of 45,542 from the previous week. There were 2,784,952 persons claiming benefits in all programs in the comparable week in 2015.

No state was triggered "on" the Extended Benefits program during the week ending March 5.

Initial claims for UI benefits filed by former Federal civilian employees totaled 722 in the week ending March 12, a decrease of 19 from the prior week. There were 1,089 initial claims filed by newly discharged veterans, an increase of 14 from the preceding week.

There were 12,944 former Federal civilian employees claiming UI benefits for the week ending March 5, an increase of 291 from the previous week. Newly discharged veterans claiming benefits totaled 14,610, a decrease of 234 from the prior week.

The highest insured unemployment rates in the week ending March 5 were in Alaska (4.4), New Jersey (3.2), West Virginia (3.2), Wyoming (3.1), Pennsylvania (3.0), Connecticut (2.9), Montana (2.9), Rhode Island (2.9), Illinois (2.8), and Massachusetts (2.8).

The largest increases in initial claims for the week ending March 12 were in California (+1,359), Nebraska (+662), Washington (+503), Oklahoma (+318), and Vermont (+285), while the largest decreases were in New York (-1,549), Illinois (-1,234), New Jersey (-1,079), Ohio (-909), and Florida (-852).

FOOTNOTES

SA - Seasonally Adjusted Data, NSA - Not Seasonally Adjusted Data

- 1. Prior year is comparable to most recent data.
- 2. Most recent week used covered employment of 136,270,223 as denominator.
- 3. Information on the EB program can be found here: EB Program information
- 4. Some states maintain additional benefit programs for those claimants who exhaust regular, extended and emergency benefits. Information on states that participate, and the extent of benefits paid, can be found starting on page 4-5 of this link: <u>Extensions and Special Programs PDF</u>
- 5. Information on STC/Worksharing can be found starting on page 4-9 of the following link: Extensions and Special Programs PDF

Note: Advance Claims are not directly comparable to claims reported in prior weeks. Advance claims are reported by the state liable for paying the unemployment compensation, whereas previous weeks reported reflect claimants by state of residence. In addition, claims reported as "workshare equivalent" in the previous week are added to the advance claims as a proxy for the current week's "workshare equivalent" activity.

Figures Appearing In columns showing Over-The-Week Changes reflect all revisions in data for prior week submitted by State agencies.

The Unemployment Compensation program for Federal Employees (UCFE) and the Unemployment Compensation for Ex-servicemembers (UCX) exclude claims filed jointly under other programs to avoid duplication.

Rate is not seasonally adjusted. The source of US total covered employment is BLS.

UNADJUSTED INITIAL CLAIMS FOR WEEK ENDED MARCH 12, 2016

STATES WITH AN INCREASE OF MORE THAN 1,000

State	Change	State Supplied Comment
CA	+1.359	No comment.

STATES WITH A DECREASE OF MORE THAN 1,000

State NY	Change -1,549	State Supplied Comment Fewer layoffs in the health care and social assistance, transportation and warehousing, and construction industries.
IL NJ	-1,234 -1,079	No comment. Fewer layoffs in the administrative, support, waste management and remediation service, construction, retail trade, health care and social assistance, and manufacturing industries.

TECHNICAL NOTES

This news release presents the weekly unemployment insurance (UI) claims reported by each state's unemployment insurance program offices. These claims may be used for monitoring workload volume, assessing state program operations and for assessing labor market conditions. States initially report claims directly taken by the state liable for the benefit payments, regardless of where the claimant who filed the claim resided. These are the basis for the advance initial claims and continued claims reported each week. These data come from ETA 538, Advance Weekly Initial and Continued Claims Report. The following week initial claims and continued claims are revised based on a second reporting by states that reflect the claimants by state of residence. These data come from the ETA 539, Weekly Claims and Extended Benefits Trigger Data Report.

A. Initial Claims

An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.

B. Continued Weeks Claimed

A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. Continued claims are also referred to as insured unemployment. The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. Continued claims reflect the current number of insured unemployed workers filing for UI benefits in the nation. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

C. Seasonal Adjustments and Annual Revisions

Over the course of a year, the weekly changes in the levels of initial claims and continued claims undergo regularly occurring fluctuations. These fluctuations may result from seasonal changes in weather, major holidays, the opening and closing of schools, or other similar events. Because these seasonal events follow a more or less regular pattern each year, their influence on the level of a series can be tempered by adjusting for regular seasonal variation. These adjustments make trend and cycle developments easier to spot. At the beginning of each calendar year, the Bureau of Labor Statistics provides the Employment and Training Administration (ETA) with a set of seasonal factors to apply to the unadjusted data during that year. Concurrent with the implementation and release of the new seasonal factors, ETA incorporates revisions to the UI claims historical series caused by updates to the unadjusted data.
